ABOUT THE AUTHOR

Mark Newman is the Chief Research Officer at Informa Telecoms & Media, leading the company's global research and business intelligence teams and activities. He is responsible for developing Informa Telecoms & Media's thought leadership in the converging mobile, broadband and entertainment sectors, harnessing his knowledge to give Informa Telecoms and Media clients the information that they need how and when they need it.

Mark's own expertise is in mobile and fixed operator strategy. He brings 16 years of experience in the telecoms and media research and publishing sectors. In his previous role, Mark was publishing director of Informa Telecoms & Media's newsletter, database and reports-publishing business. He was the founder and managing editor of a series of cutting-edge research services in the 1990s including *Global Mobile*, *3G Mobile* and *Mobile Media*.

Mark joined Informa in 1999 as part of Informa's acquisition of Baskerville, an independent business information provider. He started his career in business intelligence in 1989 as a reporter on two Financial Times newsletters, *Telecom Markets* and *Mobile Communications*.

Mark is a regular speaker and moderator at international conferences in Europe, North America and Asia. He also conducts regular briefing sessions with major banks, telecoms and IT vendors and operators on the state of the fixed and mobile telecoms sectors.

Contents

INTRODUCTION	1
CHAPTER 1	
MOBILE OPERATOR HEALTH CHECK: IN RUDE HEALTH OR IN NEED OF A NEW DIRECTION?	5
Introduction	5
The view from financial markets	5
<i>Figure 1.1: Vodafone share price fluctuation, Jan-05 to Sep-07.</i>	7
The flight to growth.	7
<i>Figure 1.2: West Europe: selected operators' share value fluctuation, 4Q04-3Q07</i>	8
<i>Figure 1.3: East Europe, Middle East and Africa: selected operators' share value fluctuation, 4Q04-3Q07.</i>	9
<i>Figure 1.4: Asia Pacific, developed markets: selected operators' share value fluctuation, 4Q04-3Q07</i>	9
<i>Figure 1.5: Asia Pacific, emerging markets: selected operators' share value fluctuation, 4Q04-3Q07.</i>	10
<i>Figure 1.6: Latin America, emerging markets: selected operators' share value fluctuation, 4Q04-3Q07.</i> ..	10
Revenue, ARPU and EBITDA trends	11
Mobile operator revenues	11
<i>Figure 1.7: North and Latin America: revenues for selected mobile operators, 2Q05, 2Q06 and 2Q07</i> ..	12
<i>Figure 1.8: Asia Pacific: revenues for selected mobile operators, 2Q05, 2Q06 and 2Q07.</i>	13
<i>Figure 1.9: West Europe: revenues for selected mobile operators, 2Q05, 2Q06 and 2Q07</i>	14
<i>Figure 1.10: East Europe: revenues for selected mobile operators, 2Q05, 2Q06 and 2Q07.</i>	15
Mobile operator ARPU	15
Comparing regional ARPU levels	15
<i>Figure 1.11: North and Latin America: monthly ARPU for selected mobile operators, 2Q05, 2Q06 and 2Q07.</i>	16

China	46
Philippines	47

CHAPTER 2

THREATS TO THE MOBILE OPERATOR BUSINESS MODEL	49
How many operators can a market support?	49
<i>Figure 2.1: One operator too many? Selected operator failures in highly competitive mobile markets</i>	49
Case study: Does 3 have a future?	50
<i>Figure 2.2: Europe, subscriptions and market share for Hutchison 3 operators, 2Q06 and 2Q07</i>	51
Regulatory approaches vary between regions	51
Middle East	52
Africa	52
Developed Asia	52
Developing Asia	52
Central Asia and Eastern Europe	52
Latin America	53
The dominance of former monopolies	53
<i>Figure 2.3: How former monopolies dominate their competitive markets</i>	53
<i>Figure 2.4: How former duopolies dominate their competitive markets</i>	53
New competition, new licences	54
<i>Figure 2.5: New spectrum allocations for mobile services</i>	54
<i>Figure 2.6: Four's a squeeze and five's a crowd</i>	55
700MHZ auctions in the US	55
France – four's a crowd?	56
Handset subsidies – here to stay and a necessary evil?	56

Handset subsidies – a global picture	57
<i>Figure 2.7: Handset subsidy strategy by region</i>	57
SAC, ARPU, churn and the ‘lifetime’ value of ‘subsidized’ subscribers	58
SACs remain flat but regionally divergent.	58
<i>Figure 2.8: Global, subscriber acquisition cost*, by region, 2Q05, 2Q06 and 2Q07</i>	59
Average selling prices (ASPs) of devices.	59
<i>Figure 2.9: Global, average selling prices of 2G, 2.5G, 3G and 3.5G handsets, 2008-2012.</i>	60
ARPU is higher, and churn lower in high SAC markets.	60
<i>Figure 2.10: Global, monthly churn by region, 2Q05, 2Q06 and 2Q07.</i>	61
Worrying signs of an increase in subsidies?	61
<i>Figure 2.11: Comparing and contrasting mobile operator KPIs* in subsidized and non-subsidized handset markets</i>	61
Transparency, choice and diversity – operators seek a more pragmatic solution to the subsidy question	63
<i>Figure 2.12: Sweden: Telenor's pricing options for the Sony Ericsson K220i</i>	63
Cannibalisation and loss of voice revenues to mobile VoIP service providers.	64
Market segmentation and roadmap for VoIP in the mobile market	65
<i>Figure 2.13: Mobile and wireless VoIP segmentation</i>	65
<i>Figure 2.14: Roadmap for different mobile VoIP solutions</i>	66
Case study: Jajah	67
<i>Figure 2.15: Jajah VoIP call.</i>	68
Case study: Rebtel	70
<i>Figure 2.16: Rebtel company details.</i>	70
<i>Figure 2.17: Rebtel homepage</i>	71
Using VoWLAN to drive the take-up of VoIP	73
<i>Figure 2.18: Global dual mode Wi-Fi handset sales, 2006-2012</i>	74
IP over cellular	75
FMC services.	75
Prospects for mobile VoIP service providers competing with mobile operators.	75
Wi-Fi as a platform for third party service providers	76
Quantifying the threat from VoIP	76
<i>Figure 2.19: Europe: international call minutes per subscriber per year in selected mobile markets, 2002-2006</i>	77
Conclusion	77
Competition from WiMAX operators.	78
Where are the certainties?	78
<i>Figure 2.20: Global: 3G/3.5G broadband services by technology, Dec 2006</i>	79
<i>Figure 2.21: Global: WiMAX target spectrum bands by region</i>	80
WiMAX in emerging markets: Middle East and Africa, Latin America, Central and Eastern Europe, India, China and the rest of developing Asia	80
WiMAX in developed markets: Western Europe, North America, developed Asia Pacific.	80
Case study: Sprint Nextel, US.	81
<i>Figure 2.22: Sprint Nextel Mobile WiMAX profile</i>	82
<i>Figure 2.23: Sprint Nextel Mobile WiMAX launch cities.</i>	83
Case study: SKT and KT, South Korea	85
<i>Figure 2.24: South Korea, KT WiBro profile.</i>	86
<i>Figure 2.25: South Korea, KT WiBro iPlug Premium USB modem (on right)</i>	86
<i>Figure 2.26: Cellular, WiBro and mobile TV subs growth and market shares, 2Q06, 3Q07 and 4Q07.</i>	87
<i>Figure 2.27: KT's WiBro pricing plans</i>	89
Quantifying the competitive challenge posed by WiMAX.	90

<i>Figure 2.28: Global total mobile broadband subscribers, by technology, 2007-2012.</i>	90
<i>Figure 2.29: Global WiMAX service revenues, by region, 2007-2012.</i>	91
Competition from MVNOs and service providers	91
The second coming (and going) of MVNOs	92
So, where are we now?	92
<i>Figure 2.30: West Europe: impact of MVNOs in the region's mobile markets, 2Q07.</i>	93
ARPU change in MVNO markets	93
<i>Figure 2.31: Europe: operator ARPU levels in selected markets, 1Q05-3Q07</i>	94
So, are MVNOs a threat or an opportunity?	95
<i>Figure 2.32: Germany, E-Plus's business case for mobile wholesale</i>	96
MVNO forecasts	96
<i>Figure 2.33: Global MVNO subscribers and regional market share. 2006-2011</i>	97
Commoditisation; losing value and revenues to Internet and software companies and device manufacturers.	97
So, why are operators scared of simply providing access?	97
Surviving the onslaught from Internet, device and entertainment brands	99
Case study: Google in Mobile	99
Regulation of mobile services	101
Termination rates	102
Roaming	103
Open access	103
CHAPTER 3	
OPPORTUNITIES FOR MOBILE OPERATORS	105
Introduction	105
New retail revenue streams from new non-voice services	105
Mobile entertainment services	106
<i>Figure 3.1: Global mobile entertainment revenues, 2007-2012</i>	106
From humble beginnings to the fourth screen?	107
Mobile music	107
<i>Figure 3.2: Global mobile music subscribers by segment, 2007-2012.</i>	108
Mobile video and TV	109
<i>Figure 3.3: Global mobile TV roundup, selected countries, Feb-08</i>	110
Mobile games and gambling	114
Mobile images	115
Mobile 2.0	115
Mobile operator business models for Web 2.0	116
Business model 3: By building their own communities	116
<i>Figure 3.4: Global mobile messaging revenues by application type, 2007-2012</i>	117
<i>Figure 3.5: Turkey: Uploading photos and video to Turkcell's Belim service.</i>	117
Building its own community case study: Cyworld	118
<i>Figure 3.6: South Korea: example of a Cyworld minihompy</i>	119
Business model 4: Partnering with existing online social networking sites	119
The future of mobile social networking	120
Access to the mobile Internet	122
Internet access via data cards, dongles and embedded SIMs	122
<i>Figure 3.7: Global: mobile broadband traffic and take-up in selected markets</i>	123
<i>Figure 3.8: Global, HSDPA subscriptions in selected operators, 4Q06-3Q07.</i>	124
<i>Figure 3.9: West Europe, Carphone Warehouse dongle sales</i>	126

Case study: Mobile One mobile broadband	126
<i>Figure 3.10: M1's personal broadband service offerings.</i>	127
<i>Figure 3.11: Singapore: M1's personal broadband location usage: majority use it at home, three in four carry it on the go.</i>	127
<i>Figure 3.12: Singapore: M1's personal broadband usage: over 40% use it as a fixed substitute</i>	128
<i>Figure 3.13: Singapore: M1's personal broadband usage: the vast majority value mobility</i>	128
Bundling laptops and services; using the relationship between the operator and the device	129
Revenue and subscription growth for connected-laptop services	129
<i>Figure 3.14: Global, installed laptops, connected (mobile broadband) laptops and mobile subscribers, by region, 2007-2012.</i>	131
Mobile Internet or the Internet on a mobile?	133
Fragmentation of mobile handset software and applications; the impact on mobile operators.	133
<i>Figure 3.15: Segmentation of the mobile OS market.</i>	134
So, why not use devices to access the Internet, just like the PC?	135
Pricing strategies for mobile broadband and Internet	136
<i>Figure 3.16: UK, 3 prepaid mobile broadband Pay As You Go add-on prices</i>	136
Mobile Internet forecasts.	137
Mobile advertising.	137
Mobile advertising definitions and business models	138
<i>Figure 3.17: Global: advertising revenue per head in selected countries, 2006</i>	139
Mobile advertising forecasts and operator revenues	140
<i>Figure 3.18: Global mobile advertising spend, by type, 2007-2012.</i>	141
Mobile payments and banking	142
<i>Figure 3.19: What are Mobile Financial Services?</i>	142
Assessing the status of mobile payments and banking	143
Entering a new phase with NFC	145
So far, so good but where's the money?	145
Machine-to-machine, enterprise and public sector	145
Machine-to-machine communications and telematics.	146
Mobile enterprise.	147
Using FMC as a strategy to entrap the mobile enterprise.	148
Mobile enterprise forecasts	149
<i>Figure 3.20: Global mobile enterprise applications and revenue forecasts, 2006 and 2011</i>	149
Public sector mobile – transport, education and health.	149
New wholesale revenues from mobile broadband	150
What is wholesale and where does it sit in an operator's business?	150
Which operators are taking the lead in developing wholesale and why?	151
Mobile operators respond belatedly to the MVNO threat – or opportunity?	152
The good, the bad and the ugly MVNOs	153
<i>Figure 3.21: Wholesale versus retail customers: return on investment.</i>	153
<i>Figure 3.22: Global MVNO scorecard - plotting the success of different types of MVNOs.</i>	154
Mobile operators ready to embrace data wholesale	155
Wholesale data case study: T-Mobile	156
Wholesale data strategy for mobile broadband	157
Smart pipes, APIs and service enablers	157
Examples of APIs	159
Applying open APIs to the telecom operator business model	159
APIs and IMS	161
<i>Figure 3.23: API scenarios for mobile operators</i>	162

Mobile partnerships; short term marriage of convenience or long term fix?	162
<i>Figure 3.24: Partnership categories</i>	163
Mobile entertainment and value-added services	163
Off-portal and D2C	164
Then came the iPhone – and Nokia and Google	165
So, is this revenue-sharing or revenue shedding?	166
Other partnership categories	167
Internet brands	167
Mobile enterprise and vertical sectors	168
Distribution: supermarkets	168
Luxury brands	169
Google, Apple/iPhone and Nokia Ovi – new models for operator relationships and revenue share	169
Who's partnering who so far?	169
Nokia	169
<i>Figure 3.25: Ovi versus Google versus iPhone: comparing mobile Internet rivals' short and long term positioning in mobile services</i>	170
iPhone	172
Google	172
<i>Figure 3.26: What is your preferred strategy for dealing with Google?</i>	172
Bridging the gap between handsets and services	172
Exclusive or non-exclusive relationships?	173
<i>Figure 3.27: Exclusive partnerships between handset manufacturers/ content companies and mobile operators</i>	174
Who gets what? Agreeing on revenue shares	174
<i>Figure 3.28: iPhone 8GB vs N95 8GB - retail costs* and operator revenues, March 2008.</i>	175
Sleeping with the enemy? The impact of Ovi, Google and the iPhone on operator business models	175
Fixed-mobile substitution	175
<i>Figure 3.29: West Europe, mobile traffic as a percentage of total voice traffic in selected markets, 2005 and 2006</i>	176
Status of FMS and strategies for driving voice usage	177
'Bundled' or 'bucket' price plans	177
<i>Figure 3.30: US: unlimited voice plans from mobile operators, Feb-08</i>	177
<i>Figure 3.31: Global: prepaid as a percentage of total subs, 2002-2012</i>	178
Home zones	178
Mobile-only homes	178
<i>Figure 3.32: Europe: penetration of mobile services across the EU</i>	179
<i>Figure 3.33: West Europe: fixed-line telephony (PSTN) subscribers in selected markets, 4Q05-4Q07.</i>	180
Is 'telephony' a viable business model for mobile operators?	180
Price elasticity	180
<i>Figure 3.34: West Europe: Price elasticity of voice demand based on calculated MOU, 2Q07</i>	181
<i>Figure 3.35: The Netherlands saw a four quarter lag for ARPU improvement, 1Q04-3Q07</i>	181
Termination rates and on-net pricing	182
Networks coverage and reliability	182
Impact of VoIP on mobile voice traffic	183
<i>Figure 3.36: Global: voice goes mobile and IP</i>	183
<i>Figure 3.37: France – leading VoIP country in Europe.</i>	184
Conclusion: FMS is a key trend but does not represent a business model	184
Capex and opex reduction	184

The hidden keys to mobile operators retaining current business models	184
Shared networks	185
Network sharing case study: Sweden	185
<i>Figure 3.38: Sweden: ownership structure of Svenska UMTS-Nat AB and Svenska UMTS-Licens AB.</i>	186
<i>Figure 3.39: Sweden: a schematic view of the Telia and Tele2 shared mobile network.</i>	187
<i>Figure 3.40: Sweden: mobile TV offerings of Tele2 and TeliaSonera over Svenska UMTS-Nat</i>	187
<i>Figure 3.41: Sweden: value of capacity purchased by TeliaSonera from Svenska UMTS-Nat, 2004-2007</i>	188
So, why isn't everyone doing it?	189
The outsourcing of different business functions	190
<i>Figure 3.42: Examples of outsourcing network operations contracts</i>	191
Outsourcing case study: 3 UK	191
Outsourced and in-house centralised services hosting	192
<i>Figure 3.43: Traditional and emerging types of hosted services</i>	193
Managed service strategies for next-generation networks	193
Cost savings from transition to all-IP and converged networks	194
Reducing headcount	194
<i>Figure 3.44: Staffing levels at selected mobile operator groups#</i>	196
A radically new approach to staffing levels?	196
Low-cost mobile operator case study: Yoigo, Spain	196
<i>Figure 3.45: Spain: mobile operators' market share, 3Q07</i>	197
Strategies to address SACs and handset subsidies	198
Promoting SIM-only subscriptions as a new line of business	198
<i>Figure 3.46: UK: O2's Simplicity SIM-only tariffs.</i>	199
Reducing the number of third party retail partners and extracting better terms from remaining ones	199
Moving away from a handset subsidy to a hire purchase business model.	199

CHAPTER 4

NEXT GENERATION MOBILE OPERATOR NETWORK STRATEGIES	201
<i>Figure 4.1: Mobile network generation launch dates, frequencies, data rates and services</i>	202
The road to 3.9G and 4G.	203
Technology issues, standardisation etc.	203
<i>Figure 4.2: Mobile network generations and deployment timelines</i>	203
<i>Figure 4.3: Mobile network generations</i>	204
<i>Figure 4.4: HSPA, HSPA+ and LTE compared</i>	205
What is 4G? And who needs it?	206
Can operators justify building 3.9G and 4G networks and, if so, when?	206
The current status of mobile operators' networks	206
<i>Figure 4.5: HSDPA –a boost for mobile data growth</i>	207
So, if HSPA is so good then who needs LTE?	207
Mobile operators' LTE deployment plans	208
Spectrum choices and availability	209
<i>Figure 4.6: Evaluating the mobile broadband strategies and scenarios for operators with different spectrum allocations.</i>	210
<i>Figure 4.7: Frequency band used for deployment drives the business model and strongly impacts radio network capex</i>	211
<i>Figure 4.8: Business case cannot be profitable without acquiring sufficient spectrum.</i>	211
Losing the connection between traffic and revenues	211
<i>Figure 4.9: Reduction of network cost is necessary to remain profitable.</i>	212

Do mobile operators really want to become ISPs and video stars?	212
Strategies for supporting high-bandwidth mobile services	213
Femtocells, cellular/Wi-Fi and LANs versus WANs	213
Femtocells	214
<i>Figure 4.10: Generic femtocell network architecture</i>	215
<i>Figure 4.11: Femtocell business models</i>	216
All-IP networks and backhaul	216
<i>Figure 4.12: NGN/IIMS - Seamless Service Provision</i>	217

CHAPTER 5

FIXED MOBILE CONVERGENCE STRATEGIES, CASE STUDIES AND BUSINESS MODELS	219
Introduction	219
<i>Figure 5.1: Convergence roadmap from an FMC perspective</i>	219
Integrated fixed and mobile operators	220
Fully convergent operators (evangelists)	220
<i>Figure 5.2: Global: multi-service operators and service providers in selected markets</i>	221
Case study: France Telecom/Orange	222
<i>Figure 5.3: Europe: presence of the Orange brand</i>	223
Case study: Telecom Italia	224
Case study: BT	226
<i>Figure 5.4: UK, BT Fusion</i>	227
Vertically integrated but uncertain about convergence (pragmatists)	228
Case study: NTT and DoCoMo	229
<i>Figure 5.5: Japan, DoCoMo and NTT share of mobile and broadband subscribers, Mar-06 to Dec-07</i>	229
Case study: Deutsche Telekom and T-Mobile	232
<i>Figure 5.6: Germany, T-Mobile and Deutsche Telekom share of mobile and broadband subscribers*, Mar-06 to Dec-07</i>	232
Case study: KPN	233
<i>Figure 5.7: Europe: KPN's strategic building blocks to become 'best-in-class' network operator</i>	235
Mobile operators	235
'Pure' mobile operators (aggressors)	235
Case study: 3 and H3G	236
Case study: Sprint Nextel	238
Mobile operators adding broadband (hybrids)	240
Case study: Vodafone	240
Case study: SK Telecom	242
Case study: Wind	244
<i>Figure 5.8: Italy: selected broadband services offered by Wind, 2007</i>	244
Convergent futures?	245

CHAPTER 6

CONCLUSIONS AND FORECASTS	247
Do mobile operators need new business models?	247
<i>Figure 6.1: The differences between business models in mature developed and emerging markets</i>	247
<i>Figure 6.2: Global mobile voice and data revenue growth, 2005-2012</i>	248
Future non-voice-service business models; impact of the iPhone	248
iPhone usage case studies	249

iPhone – a freak or the future of mobile? Is the 4th screen an inevitability?	250
Verizon Wireless and its Open Development Initiative	250
Retail ODI business model	252
Wholesale ODI business model	252
Custom ODI business model	252
New applications, new customers, new revenues	253
New service revenue forecasts: factoring in cross-service cannibalization	254
<i>Figure 6.3: Global mobile annual service revenue growth, by region, 2008-2012</i>	<i>254</i>
