ABOUT THE AUTHORS

Shailendra Pandey is a Senior Research Analyst within Informa Telecoms & Media's Industry Research division. He has been covering the mobile communications sector for over four years and has produced research, analysis, and forecasts on a range of mobile wireless topics including mobile operator and handset vendor strategy. Shailendra has been quoted on numerous occasions in both print and online media including *The Wall Street Journal*, *New York Post*, *Financial Times*, *The Independent*, *RCR Wireless News* and *MarketWatch*.

Shailendra's educational qualifications include an MA in Public Relations & Communications from University of Westminster, London; an MBA from Pune University, India; and a Post Graduate Diploma in Journalism from University of Mumbai, India.

Pamela Clark-Dickson is a Senior Analyst at Informa Telecoms & Media, with a focus on mobile messaging. In her role, Pamela produces analysis of the messaging market for the Mobile Content and Applications Intelligence Center. Her areas of expertise cover all aspects of mobile messaging in the consumer, enterprise and marketing industry sectors globally, including SMS, MMS, mobile e-mail, mobile instant messaging and voice SMS. She also edits *Mobile Messaging Analyst*, a continuous research service published by Informa.

Pamela has covered the telecoms sector for 13 years as an analyst and journalist, and previously worked for Informa as editor of the *Mobile Media* and *Mobile Games Analyst* continuous research services. She is also the co-author of Informa's *Mobile Games* report, published in 2005.

Pamela holds a BA (Journalism) from the University of Southern Queensland, Australia.

Jamie Moss is a Senior Research Analyst examining Mobile Content and Applications at Informa Telecoms & Media. He has been working as an analyst and consultant to the telecommunications industry since 1999, covering the deployment of value added services and next-generation infrastructure by wireless network operators, as well as the wholesale bandwidth market for submarine and terrestrial fiber optic carriers. Jamie's experience has included writing market research reports, developing databases of operational benchmarks and building front-end analytical tools. Over the years, he has also provided bespoke consulting expertise to device manufacturers, platform/solution vendors and to telecommunications network infrastructure owners.

Jamie holds a BA (Hons) in History from the University of East Anglia in the UK.

CHAPTER 4	
MOBILE ENTERTAINMENT	279
Introduction and market overview	279
<i>Figure 4.1: Mobile entertainment market overview</i>	280
Mobile music	281
Mobile music by type	281
<i>Figure 4.2: Segmentation of the mobile music market.</i>	281
Ringtones	281
Ringback tones (RBTs)	283
Full track downloads (FTDs)	284
Streaming music	284
Current market status	285
<i>Figure 4.3: Europe and the US: number of users who purchased ring tones, by method, monthly average Jun-Aug 08</i>	285
<i>Figure 4.4: Europe and the US: number of mobile users who listened to digital music, by method, monthly average Jun-Aug 08</i>	287
North America	288
Latin America	288
Asia Pacific	289
Europe	292
Africa	294
Middle East	295
Pricing models	295
One-off payment model	296
Subscription model	296
Subsidized pricing model	297
Key findings and conclusions	297

Case studies and service initiatives	299
MusicStation from Omnipone	299
Nokia's Comes With Music and Music Store	301
Real Networks/Rhapsody	302
Apple	303
MOOV on mobile from PCCW Mobile	304
Mobile games	305
Value chain	305
<i>Figure 4.5: The mobile games value chain</i>	305
<i>Figure 4.6: Mobile games companies by business type</i>	306
Current market status	306
<i>Figure 4.7: Europe and the US: number of mobile users who played mobile games, by type, monthly average Jun-Aug 08.</i>	307
Asia Pacific	309
Europe	311
North America	312
<i>Figure 4.8: US: number of mobile users who played games on mobile phones, by top genres, monthly average May- Jul 08.</i>	313
Key market trends	313
Sales and distribution	314
Move towards direct-to-consumer (D2C) channels	314
Software environment	315
Fragmentation	316
Key findings and conclusions	317
Case studies and service initiatives	318
Gameloft	318
SNAP Mobile by Nokia	318
<i>Figure 4.9: Features in Nokia's SNAP Mobile community services package</i>	319
Digital Chocolate	320
Indiagames	321
<i>Figure 4.10: Indiagames GoD (Games-on-Demand) subscription service: Top 10 Games of 2007</i>	322
Mobile TV and video	322
Mobile TV and video value chain	323

Mobile TV and video formats	325
<i>Figure 4.12: Mobile content production costs</i>	325
<i>Figure 4.13: How likely are the various formats of Mobile TV content to be successful?</i>	326
Simulcast	326
Re-purposed content	327
Ancillary content	328
Made-for-mobile content	329
Current market status	330
<i>Figure 4.14: Streaming mobile TV, selected services</i>	331
<i>Figure 4.15: Europe and the US: number of mobile users who watched mobile TV/video, by service type, monthly average May-Jul 08</i>	333
Technology overview	334
<i>Figure 4.16: Mobile broadcast technology groups</i>	335
Key market drivers	336
Renewed interest in TDTV	336

Declining cost of chipsets	337
<i>Figure 4.17: Decline in mobile TV chipset cost, 2006-2012.</i>	337
Analog growth	338
<i>Figure 4.18: Selected markets' analog switch-off dates.</i>	338
Major sporting occasions	339
Advertising-based model gaining traction	339
Europe-wide backing for DVB-H	340
Service Neutral Airwaves	340
Key market barriers	342
Handset availability	342
Standards fragmentation	342
Consumer apathy over mobile TV	343
High cost of deployment	344
Availability of spectrum	345
Lack of proven business model	345
Business models	345
<i>Figure 4.19: Selected launched DVB-H services and business models.</i>	347
Key findings and conclusions	348
Case studies and service initiatives	350
AT&T's MediaFLO service in the US	350
Mobile 3.0 in Germany	351
T-Mobile's video-on-demand service in Germany	352

<i>Figure 4.27: Adult content available on 3's portal.</i>	379
Personalization	379
CHAPTER 5	
MOBILE PAYMENTS, BANKING AND FINANCIAL SERVICES	381
Mobile payments	382
Remote payments	382
Mobile banking	382
Mobile funds transfer	384
<i>Figure 5.1: Fee charged for funds transfer from the US to selected countries for an average remittance value of US\$200, 2008.</i>	385
Local payments	385
Contactless payments	385
<i>Figure 5.2: Contactless payment ecosystem</i>	386
<i>Figure 5.3: Sony FeliCa</i>	387
<i>Figure 5.4: NFC point of sale reader</i>	388
Related mobile services	388
Current market status	388
Market drivers	390
Poor access to financial services in developing markets	390
<i>Figure 5.5: Global: proportion of households with access to a financial institution, March 2007.</i>	391
Quicker ROI and attractive revenue potential	391
Opex savings and reduced churn	392
Market barriers	392
Regulatory hurdles	392
Anxiety of banks to mobile operators entering their domain	392
High service charges	393
Technology	393
Server-side applications	393
Client-side applications	394
Regional trends	395
<i>Figure 5.6: M-payments development cycle.</i>	396
Sybase mobile finance survey	396

APPENDIX

MOBILE CONTENT & SERVICES INDUSTRY SURVEY 2008	613
Survey participants	613
<i>Figure A.1: Industry Survey participants</i>	613
<i>Figure A.2: Regional presence of Industry Survey participants</i>	614
Respondent profile	614
<i>Figure A.3: Respondent profile of Industry Survey participants</i>	614
Key market drivers for mobile content and services	614
<i>Figure A.4: Mobile content and services' key market drivers</i>	615
Key market barriers for mobile content and services	615
<i>Figure A.5: Mobile content and services' key market barriers</i>	616
Services critical for mobile data revenues	616
<i>Figure A.6: Services considered as critical for mobile data revenues</i>	617
Participants were asked to give their opinion on whether they agree or disagree to certain statements that are being debated in the mobile industry	617
Mobile web services will not succeed unless users have flat rate data plans	617
<i>Figure A.7: Mobile web services will not succeed unless users have flat rate data plans</i>	618
Advertising is inevitable if mobile web services are to generate revenues	618
<i>Figure A.8: Advertising is inevitable if mobile web services are to generate revenues</i>	618
Mobile phones have the potential to replace debit and credit cards	619
<i>Figure A.9: Mobile phones have the potential to replace debit and credit cards</i>	619
Mobile phones will never be suitable for large scale payments and transactions	619
<i>Figure A.10: Mobile phones will never be suitable for large scale payments and transactions</i>	620

Social networking and community services will have a significant impact on driving peer-to-peer (P2P) uptake of mobile content	620
<i>Figure A.11: Social networking and community services will have a significant impact on driving peer-to-peer (P2P) uptake of mobile content.</i>	620
Likelihood of success for different mobile TV content formats	621
<i>Figure A.12: Likelihood of success for different mobile TV content formats.</i>	621
Most likely pricing models for mobile TV services	621
<i>Figure A.13: Most likely pricing models for mobile TV services.</i>	622
Factors critical for the success of the mobile Internet	622
<i>Figure A.14: Factors considered as critical for the success of mobile Internet.</i>	622
Most accessed content on the mobile Internet.	623
<i>Figure A.15: Proportion of their mobile Internet usage that subscribers are likely to spend on accessing the different types of content</i>	623
Mobile content that consumers are likely to pay for in addition to their regular monthly tariffs	624
<i>Figure A.16: Likelihood of users paying for the different types of mobile content in addition to their regular monthly tariffs</i>	624
Will flat-rate tariffs for the mobile Internet result in reduced usage of separate offers/bundles for the various mobile content and services?	625
<i>Figure A.17: How LIKELY is it that flat-rate tariffs for the mobile Internet will result in reduced usage of separate offers/bundles for the various mobile content and services?</i>	625
<i>Figure A.18: How UNLIKELY is it that flat-rate tariffs for the mobile Internet will result in reduced usage of separate offers/bundles for the various mobile content and services?</i>	626
Fair monthly tariff for unlimited mobile Internet package	626
<i>Figure A.19: Fair monthly tariff for unlimited mobile Internet package, assuming 1GB data limit as part of operator's fair user policy</i>	627
Importance of various pricing models for mobile content provision	627
Currently	627
<i>Figure A.20: Importance of various pricing models for mobile content provision, currently</i>	627
In five years' time	628
<i>Figure A.21: Importance of various pricing models for mobile content provision, in five years' time.</i>	628
Importance of various sales channels for mobile content sales	628
Currently	628
<i>Figure A.22: Importance of various sales channels for mobile content sales, currently</i>	629
In five years' time	629
<i>Figure A.23: Importance of various sales channels for mobile content sales, in five years' time</i>	630
Fair revenue share between operator and content provider.	630
When content is sold through an operator's portal/deck	630
<i>Figure A.24: Fair revenue share when content is sold through an operator's portal/deck</i>	630
When content is sold through content provider managed portal within operators' network	631
<i>Figure A.25: Fair revenue share when content is sold through content provider managed portal within operators' network</i>	631
When content is sold direct-to-consumer by the content provider/publisher using an operator-provided billing mechanism	631
<i>Figure A.26: Fair revenue share when content is sold direct-to-consumer by the content provider/publisher using an operator-provided billing mechanism</i>	632
Importance of the various payment mechanisms for mobile content billing	632
Currently	632
<i>Figure A.27: Importance of various payment mechanisms for mobile content billing, currently</i>	633
In five years' time	633
<i>Figure A.28: Importance of various payment mechanisms for mobile content billing, in five years' time</i>	634

Survey questionnaire	635
Mobile content & services market drivers and barriers	636
Mobile content & services usage and adoption trends	636
Mobile content & services pricing	639
Mobile content sales and delivery channels	640
Mobile content payment mechanisms	641
