About the Authors

Dimitris Mavrakis, the lead author of *Mobile Network APIs*, is a Senior Analyst with Informa Telecoms & Media. His research areas include core and radio access networks, network convergence and next generation networks. Dimitris is an author of several Informa reports including *WiMAX Broadband Convergence*, *Mobile Broadband Access at Home* and *IMS Opportunities and Challenges*. He has also been the leading consultant for many projects on behalf of market leaders in the mobile market value chain. Dimitris holds a PhD in Mobile Communications.

Dr Malik Kamal-Saadi is a Principal Analyst at Informa Telecoms & Media. Within his role, Malik acts as a Thought Leader across different sectors of the global telecommunications industry including Devices, Networks & Infrastructure and Multimedia Services. He has planned, authored and co-authored many Informa Telecoms & Media reports including *Future Mobile Handsets*, *Mobile Applications Platforms & Operating Systems*, *Mobile Broadband Networks*, *Mobile Access at Home*, *Mobile VoIP*, *Open Source in Mobile*, *IP Multimedia Systems (IMS)*, *Mobile Converged Devices*, *Mobile Computing Devices*, and *Metropolitan Area Networks and Switching Technologies*. He has also contributed to the planning for the content of many of Informa events and workshops and was involved in the Telecoms Academy's Mini MBA program.

Malik is a frequent speaker at international conferences on mobile telecommunications. He has over 13 years' experience in the telecommunications industry as a technology expert and analyst following different technologies from inception to maturity. He has also played a key role in a number of European and Government projects.

Malik has a PhD degree from Groupe d'Etude des Semiconducteurs (GES, France), specializing in Semiconductor Devices and Materials, Design and Engineering.

Contents

CHAPTER 1	
EXECUTIVE SUMMARY 1	
Market overview	2
Operator initiatives	3
<i>Figure 1.1: Operator openness</i>	4
Vendors attempting to differentiate	5
Open API business models	7
Long tail of consumer applications	8
<i>Figure 1.2: Revenue opportunities for long tail of consumer applications</i>	9
Future outlook	9
<i>Figure 1.3: Details of selected API initiatives</i>	10
CHAPTER 2	
NETWORK API MARKET STATUS AND OUTLOOK 11	
Major changes in the mobile market and the role of network APIs 11	
Mobile market overview 12	
<i>Figure 2.1: Mobile broadband revenues and traffic forecasts</i>	13
Network APIs 14	
Web companies moving in the mobile value chain 15	
Device vendors becoming service providers 16	
The app store phenomenon 18	
<i>Figure 2.2: App stores by mobile operators and handset vendors, 3Q09</i>	19
The new value chain 19	
<i>Figure 2.3: Traditional vs. the new service-oriented mobile value chains</i>	20
Why are operators opening APIs? 20	
Avoid becoming a dumb pipe	21
Increase basic network usage	21
Increase subscriptions and reduce churn	21
Ability to create service tiering and subscription-based services	21
Bring experimentation into the operator service delivery model	22
Build future relationships	22
Operator strengths for network APIs	22
Brand strength and heritage	22
Billing relationship	23
Convenience and ease of use	23
Save time and costs	23
Target all developers	23
Security	24
Operator weaknesses in the new value chain 24	
Lack of reliability	24
Lack of standards and common practice	24
Entering a crowded field	24
Little exclusivity	24
Inability to replicate the online model	25
Lack of demand for operator services	25

CHAPTER 3	
OPERATOR STRATEGIES AND POSITIONING FOR MOBILE NETWORK APIS	27
Market overview	27
The need for open network APIS	28
Operator positioning	29
<i>Figure 3.1: Operator differentiation and API involvement</i>	30
<i>Figure 3.2: Selected operator API initiatives</i>	30
Operators in the application store business	31
Service mashups	32
Integrated strategy and two sided business models	32
Two-sided business models	32
Orange	33
Background	33
APIs	34
<i>Figure 3.3: Orange Partner network APIs, 1Q09</i>	35
<i>Figure 3.4: Orange Partner API segmentation</i>	35
API business models and strategy	35
SWOT analysis	36
<i>Figure 3.5: Orange Partner SWOT analysis</i>	37
Telefonica O2 Litmus	38
Background	38
APIs	38
API business models and strategy	39
<i>Figure 3.6: O2 Litmus ecosystem</i>	40
SWOT analysis	40
<i>Figure 3.7: O2 Litmus SWOT analysis</i>	41
Vodafone	41
Background	41
API initiatives	42
Betavine	42
<i>Figure 3.8: Betavine API structure</i>	43
Joint Innovation Lab and commercial APIs	43
API business models and strategy	44
SWOT analysis	45
<i>Figure 3.9: Vodafone API strategy SWOT</i>	46
AT&T's devCentral and Apps Beta	46
Background	46
APIs	46
<i>Figure 3.10: AT&T Apps Beta compatible handsets, Apr-09</i>	47
API business models and strategy	47
SWOT analysis	48
<i>Figure 3.11: SWOT analysis for AT&T's open initiatives</i>	48
Ribbit	49
Background	49
<i>Figure 3.12: Ribbit features</i>	49
APIs	50
<i>Figure 3.13: Ribbit's platform architecture</i>	50
API business models and strategy	51
SWOT analysis	51

<i>Figure 3.14: Ribbit SWOT analysis</i>	52
Verizon Wireless	52
Background	52
APIs and strategy	52
SWOT analysis	53
<i>Figure 3.15: Verizon Wireless SWOT analysis</i>	53
Telenor	54
Background	54
APIs and strategy	54
<i>Figure 3.16: Telenor Content Provider Access APIs</i>	55
<i>Figure 3.17: Telenor CPA API charges, Jun-09</i>	55
SWOT analysis	56
<i>Figure 3.18: Telenor CPA APIs' SWOT analysis</i>	56
CHAPTER 4	
NETWORK API TECHNOLOGY EVOLUTION AND STANDARDS	57
Introduction	57
<i>Figure 4.1: API technology historical overview</i>	58
Past: telecoms grade protocols	58
Present: open systems and Web protocols	58
Future: interoperable service-aware networks	59
An overview of legacy technologies	60
CAMEL	60
CAMEL for prepaid roaming	61
Alternatives	62
JAIN	62
Parlay	62
The role of standardization in reshaping current technologies	63
API technologies	63
REST	64
SOAP	65
WSDL	65
Standards	66
GSMA OneAPI	66
<i>Figure 4.2: Benefits of GSMA OneAPI</i>	66
OMTP BOND1	68
JIL	68
Next-generation technologies	69
IMS/IPX	70
Service interoperability	71
IMS vs. open APIs	71
GSMA RCS	72
<i>Figure 4.3: Rich Communication Suite (RCS), key participants, Jul-09</i>	72
<i>Figure 4.4: Simplified illustration of interoperable RCS services</i>	73
WIMS 2.0	73
<i>Figure 4.5: Benefits of Web 2.0 and IMS in WIMS 2.0</i>	74
Open network APIs and next-generation networks	75
LTE/SAE	75
Background	75

<i>Figure 4.6: Simplified functional diagram of a LTE/SAE network</i>	76
Open APIs and LTE/SAE	77
Service delivery evolution strategies	79
<i>Figure 4.7: Service delivery evolution.</i>	79

CHAPTER 5

THE RATIONALE BEHIND DEPLOYING NETWORK APIS 81

API business models 81

App store enablers 81

Two-sided business models 82

Web services and mashups 82

Summary 83

Skepticism and revenue potential 83

Reducing costs 84

Long tail of consumer applications 84

Network API revenue models 85

APIs in the business environment 85

Operator app stores 87

 Costs for app stores and developer communities 88

Figure 5.1: Value and associated costs of app stores. 88

 Competition from device vendors 89

Long tail of consumer applications 89

Figure 5.2: Long tail of consumer applications 90

Figure 5.3: Long tail revenues 90

Two-sided business models 92

Figure 5.4: Two-sided business model revenue sources. 92

Figure 5.5: Operator service provisioning segmentation. 93

Web mashups 94

Revenue models 95

 Chargeable APIs 95

Figure 5.6: Chargeable API business models. 95

 Traffic generation 96

 Revenue-share agreements 96

Developer communities 97

Past: weathered relationship between operators and developers 97

Figure 5.7: Application development cycle and time to monetization of mobile operator portal. 98

Present: operator culture is changing 98

Developer attention is shifting 99

Figure 5.8: Three centers of gravity for Web applications development. 99

Device vendor app stores 100

Operator-branded app stores 102

Satisfying developers 103

Figure 5.9: Historical comparison of operator-developer relationship 103

CHAPTER 6

GLOBAL VENDOR STRATEGIES FOR NETWORK APIS 105

Market overview 105

Service delivery evolution 105

Figure 6.1: Middleware positioning for open API implementation. 106

<i>Figure 6.2: Middleware for open APIs</i>	107
Vendor strategies	107
<i>Figure 6.3: Open API enabling technologies</i>	107
<i>Figure 6.4: Selection of important vendors in the open API market</i>	108
Key trends	108
Service orientation for telecoms vendors	109
Telecoms orientation for IT vendors	109
Evolution of messaging platforms	110
Tier 1 vendors: NSN, Ericsson and Huawei	110
Oracle	111
Background	111
<i>Figure 6.5: Oracle's acquisitions in the telecoms market</i>	111
Products and services	112
<i>Figure 6.6: Oracle's Communication Services Gatekeeper value proposition</i>	113
Strategy	113
SWOT analysis	114
<i>Figure 6.7: Oracle network API SWOT analysis</i>	114
AePONA	114
Background	114
Products and services	115
<i>Figure 6.8: AePONA product details</i>	116
<i>Figure 6.9: AePONA Universal Service Platform</i>	116
Strategy	117
SWOT analysis	117
<i>Figure 6.3: AePONA SWOT analysis</i>	118
Alcatel-Lucent	118
Background	118
Products and services	119
<i>Figure 6.11: Alcatel-Lucent's API strategy</i>	119
<i>Figure 6.12: Alcatel-Lucent's key pillars for enabling applications</i>	119
Strategy	120
SWOT analysis	120
<i>Figure 6.13: Alcatel-Lucent SWOT analysis</i>	120
Nokia Siemens Networks (NSN)	121
Background	121
Products and services	121
<i>Figure 6.14: NSN's Service Delivery Framework</i>	122
Strategy	122
SWOT analysis	123
<i>Figure 6.15: NSN open API strategy SWOT analysis</i>	123
Huawei	124
Background	124
Products and services	124
SDP	124
OSS	125
Strategy	125
SWOT analysis	126
<i>Figure 6.16: Huawei's network API strategy SWOT</i>	126

Ericsson	127
Background	127
Products and services	128
<i>Figure 6.17: Ericsson's products for service delivery and provisioning.</i>	128
Strategy	129
SWOT analysis	129
<i>Figure 6.18: Ericsson's API strategy SWOT analysis.</i>	130
Telcordia	130
Background	130
Products and services	131
<i>Figure 6.19: Telcordia's Service Delivery and Charging products</i>	131
Strategy	131
SWOT analysis	132
<i>Figure 6.20: Telcordia's API strategy SWOT analysis.</i>	132
Airwide Solutions	133
Background	133
Products and services	133
<i>Figure 6.21: Airwide Solutions' Open Services Framework.</i>	134
Strategy	134
SWOT analysis	135
<i>Figure 6.22: Airwide Solutions SWOT analysis.</i>	135
CHAPTER 7	
FUTURE OUTLOOK	137
Service delivery quadrants and operator positioning	137
Operators adopting different strategies for network APIs	137
<i>Figure 7.1: Service delivery segmentation and operator positioning</i>	137
Increasing value in the business model	138
Mobile network APIs: future outlook	139
Main drivers	139
<i>Figure 7.2: Selected API initiatives</i>	140
API evolution	141
Revenue potential	142
<i>Figure 7.3: API revenue potential future outlook</i>	142
Open and closed operators	143
Combating the force of the Web	144
Device APIs vs. network APIs	145
Device vendors	146
Mobile operators	146
The users	147
Key conclusions for mobile operators	147
Future outlook	148
Attracting developers and adding new services	148
Guaranteeing quality for premium partners	148
